Re: Power Integrations v. Fairchild Semiconductor et al. (CA 04-1371 JJF)

Dear Howard:

As I mentioned in my letter of October 30, 2006, the color photo plots that were taken of Mr. Beasom's test wafers are available for inspection at our offices. Please contact me at your earliest convenience to arrange a time for inspection.

Your letter of October 26, 2006 mischaracterizes the Intersil test wafers, test devices, and accompanying documents as a new production. Mr. Beasom discussed these test devices at his January 26, 2006 deposition, and stated that he "provided those to Legal as a part of the response to the subpoena." Mr. Guy stated on the record that he expected these to be produced from third party Intersil. Both Fairchild and Power Integrations had ample opportunity to depose Mr. Beasom about these matters. Power Integrations cannot claim prejudice, as it was well aware of the existence of these test wafers, had the opportunity to explore that during Mr. Beasom's deposition, and knew that these would be relevant to establish reduction to practice at the invalidity phase of the trial.

Furthermore, the fact is that Fairchild does not have control over Mr. Beasom's test wafers, devices, and documentation, or the actions of Mr. Beasom or Intersil. Indeed, to this day Intersil resists providing the actual test wafers and devices to Fairchild. Fairchild did not even learn of much of the accompanying documentation until recently. Nonetheless, Fairchild has ensured that everything obtained from Intersil is produced to Power Integrations well in advance of trial and as soon as Fairchild learns of it. Should Power Integrations wish to inspect the wafers and test devices themselves, it is Fairchild's

understanding that Intersil will make them available at the law offices of Shore Chan in Dallas, Texas. Similarly, it is Fairchild's understanding that Intersil will make these materials available for inspection in Wilmington, Delaware, immediately before trial.

Sincerely,

Brian H. VanderZanden
